

2. Gemini API Familiarity

FitBuddy – AI Fitness Plan Generator using Gemini Models

Gemini provides the AI generation layer for FitBuddy. The project uses Gemini to generate personalized workout plans, update plans from feedback, and provide nutrition tips.

Important Points

- Gemini workout generation is used for structured 7-day plans.
- A Gemini model is used for nutrition and recovery tips.
- The API key is supplied through the `GOOGLE_API_KEY` environment variable.
- Model names can be configured through environment variables.
