

3. HTML, CSS and Jinja2 Template Skills

FitBuddy – AI Fitness Plan Generator using Gemini Models

HTML, CSS, and Jinja2 are used to create the FitBuddy user interface and display dynamic AI-generated content.

Important Points

- index.html collects user information.
- result.html displays the generated workout plan and nutrition tip.
- all_users.html provides the admin/user view.
- Jinja2 inserts backend data dynamically into HTML templates.
- CSS provides responsive page styling.
