

6. SQLAlchemy and SQLite Basics

FitBuddy – AI Fitness Plan Generator using Gemini Models

SQLite is used as the local database and SQLAlchemy provides the Python database interface for FitBuddy.

Important Points

- Stores user information.
- Stores generated AI plans.
- Keeps original and updated plans separately.
- Provides database functions such as `save_user`, `save_plan`, `update_plan`, `get_original_plan`, and `get_user`.
- The database file is created as `fitbuddy.db`.
