

## 8. Uvicorn ASGI Server

### FitBuddy – AI Fitness Plan Generator using Gemini Models

Uvicorn is the ASGI server used to run the FastAPI FitBuddy application.

#### Important Points

- Starts the FastAPI application locally.
- Typical command: `uvicorn app:app --reload`.
- The application can be opened at `http://127.0.0.1:8000`.
- FastAPI interactive documentation is available at `/docs`.
- The `--reload` option supports development by reloading after code changes.
